Upper-Premium / Luxury

luxury Models - Model S and Model X

- Niche Market Presence
- Aging & Declining Appeal
- Legacy Without an Evolution Plan
- Sales Decline & Pricing Adjustments

Competitors:

Model S: Mercedes EQS, BMW i7, Lucid Air, Porsche Taycan, Audi e-tron GT

Model X: Mercedes EQS SUV, BMW iX, Rivian R1S, Lucid Gravity, Cadillac Lyriq

(CNN Business, 2023; Wall Street Journal, 2023)

CURRENT LINEUP & POSITIONING

Mid-Segment/Mass Market - Model 3 and Model Y

- Model Y: World's Best-Selling Vehicle (2024)
- **Tesla's Core Revenue Drivers** (Mainstream appeal)
- **Strong Gigacasting & Production Efficiency** (Lower costs than competitors)
- Global Availability & Market Dominance

•Competitors:

Model 3: BMW i4, Polestar 2, Hyundai Ioniq 6, VW ID.7

Model Y: Hyundai Ioniq 5, Ford Mustang Mach-E, BMW iX3, BYD Seal

(Premium but Affordable)

(Forbes Business Council, 2024; Stopford, 2023)

CURRENT LINEUP & POSITIONING

Unique/New Entrant – Cybertruck

- **Niche Market Presence (Futuristic & disruptive design)**
- **Strong brand anticipation & hype**
- **Production & scaling issues** (complex manufacturing process)
- **Pricing higher than originally promised**
- **Uncertain market demand** (many reservations, but will buyers convert?)
- **Strong competition from established truck brands**

•Competitors:

Ford F-150, Rivian R1T, Chevy Silverado EV, GMC Hummer EV, RAM 1500 REV

Cybertruck is targeting a new niche rather than competing directly with legacy trucks.

- The global budget EV market is dominated by competitors like BYD, Volkswagen, and MG.
- Without an affordable EV offering, Tesla risks losing market share in the \$30K segment.

(Volkswagen, 2025; Carwow, 2025; Stellantis & You, 2025)

WHY TESLA MUST ACT NOW

Sub-\$30K EVs from **BYD, VW, and Stellantis**
have established the market.

- BYD sold 4.27 million EVs in 2024 (+41% YoY), overtaking Tesla. In contrast, Tesla sold **1.79 million EVs**, marking a **1.1% decline** from 2023 (CNEVPost, 2025; AP News, 2024).
- VW ID.2 launching at \$31K, undercutting Tesla prices (Volkswagen Newsroom, 2023).
- Stellantis expanding affordable EVs in Europe with Peugeot e-208 (€28K, best-selling B-segment EV in 2022) & Leapmotor partnership (The Scottish Sun, 2024; Electrifying.com, 2025).
- 40% growth expected in Europe's EV market (EV Boosters, 2024).
- China's electric vehicle market is expected to experience significant growth, with revenue projected to reach \$377.9 billion by 2025, driven in part by the rising demand for budget EVs (Statista, 2024).

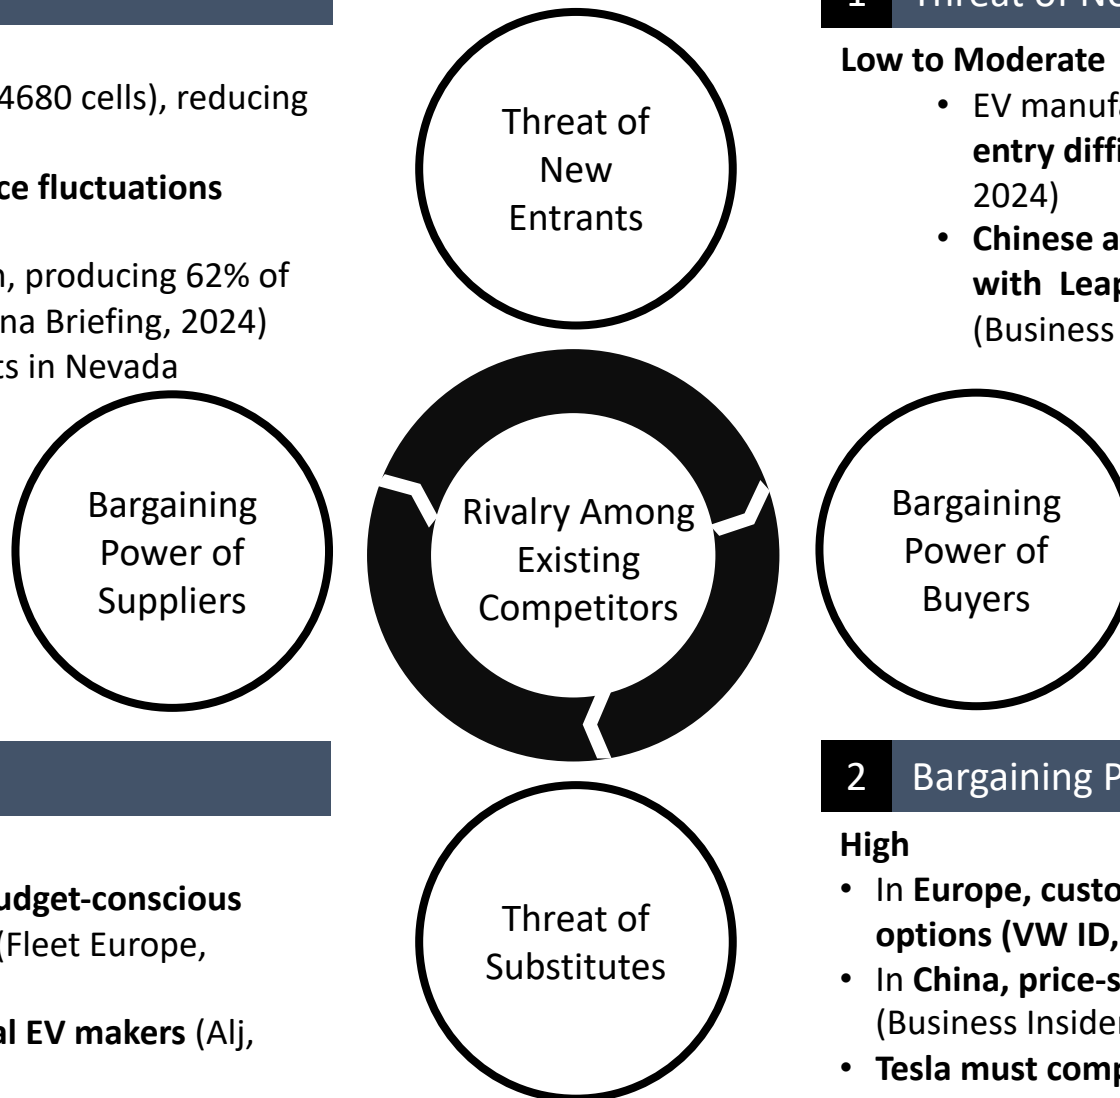

If Tesla doesn't enter this market now, it risks losing long-term dominance.

PORTERS 5 FORCES

4 Bargaining Power of Suppliers

Moderate

- Tesla **controls its own battery production** (4680 cells), reducing supplier dependency (Electrek, 2022).
- However, **raw material (lithium, nickel) price fluctuations** impact costs (Reuters, 2025).
- China dominates the global EV supply chain, producing 62% of EVs and 77% of EV batteries (ITIF, 2024; China Briefing, 2024)
- Tesla's has secured lithium-rich clay deposits in Nevada strengthens long-term supply stability (Electrek, 2020).

3 Threat of Substitutes

Moderate

- In Europe ICE/hybrid cars still dominate budget-conscious segments, especially in emerging markets (Fleet Europe, 2024).
- In China, government incentives favor local EV makers (Alj, 2024).
- Public transport & ride-sharing (Uber, bolt) are growing alternatives in urban areas

1 Threat of New Entrants

Low to Moderate

- EV manufacturing is **capital-intensive**, making **market entry difficult** (Financial Times, 2024; Kim and Park, 2024)
- **Chinese automakers (BYD, Xpeng) + Stellantis partnered with Leapmotor** are accelerating global expansion (Business Insider, 2025; Le Monde, 2024)

2 Bargaining Power of Buyers

High

- In Europe, customers have multiple budget-friendly EV options (VW ID, MG4 EV, BYD Dolphin).
- In China, price-sensitive buyers prefer BYD & local brands (Business Insider, 2024).
- Tesla must compete with cheaper Evs.

PORTERS 5 FORCES

5 Rivalry Among Existing Competitors

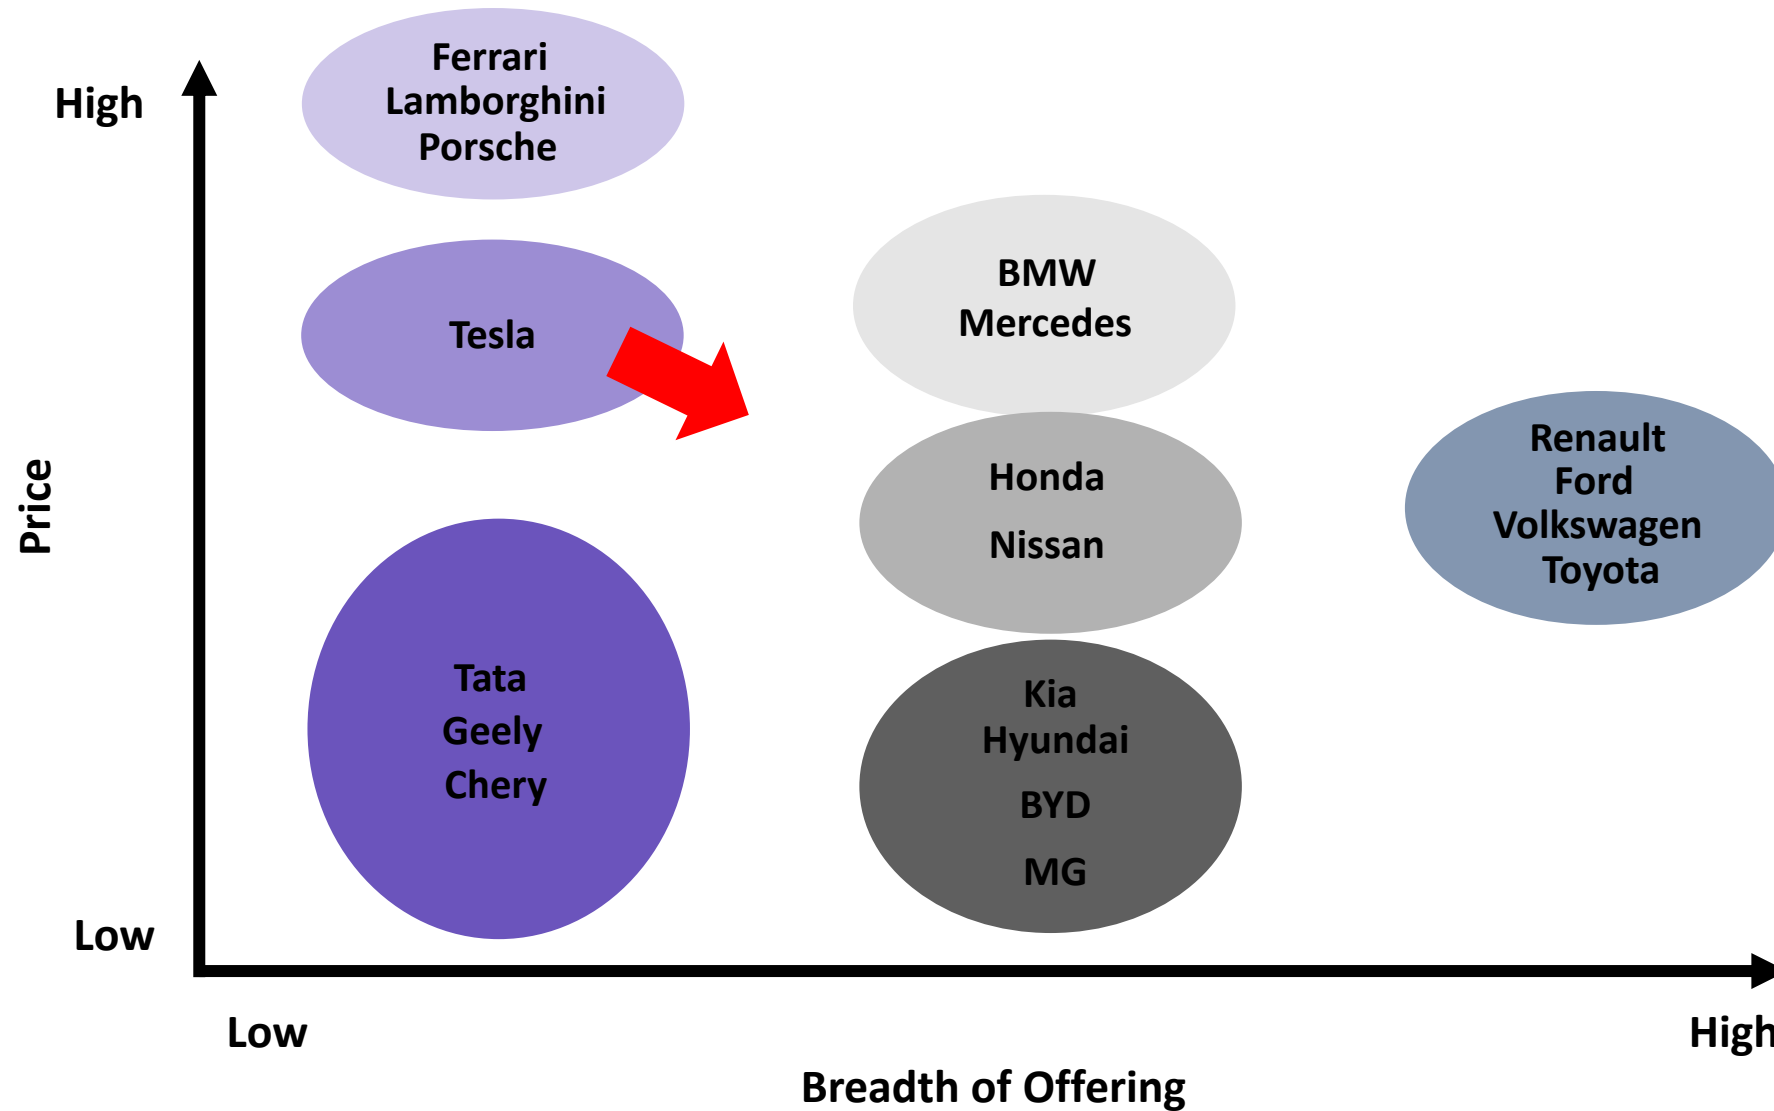

High

- **In Europe** The **subcompact EV segment is becoming a battlefield** with **Volkswagen (ID.2), Stellantis (Panda EV, Leapmotor), BYD (Dolphin), MG, Hyundai-Kia (EV4), and Dacia (€15K EV)** aggressively competing (The Sun, 2024; Automotive News Europe, 2024; The Scottish Sun, 2024).
- **Price wars are intensifying** as brands **cut margins to gain market share** (Reuters, 2024; Financial Times, 2024).
- **In china** Tesla faces intense **price wars & government-backed competitors** such as BYD, Xpeng receive subsidies giving them an unfair price advantage (Alj, 2024).

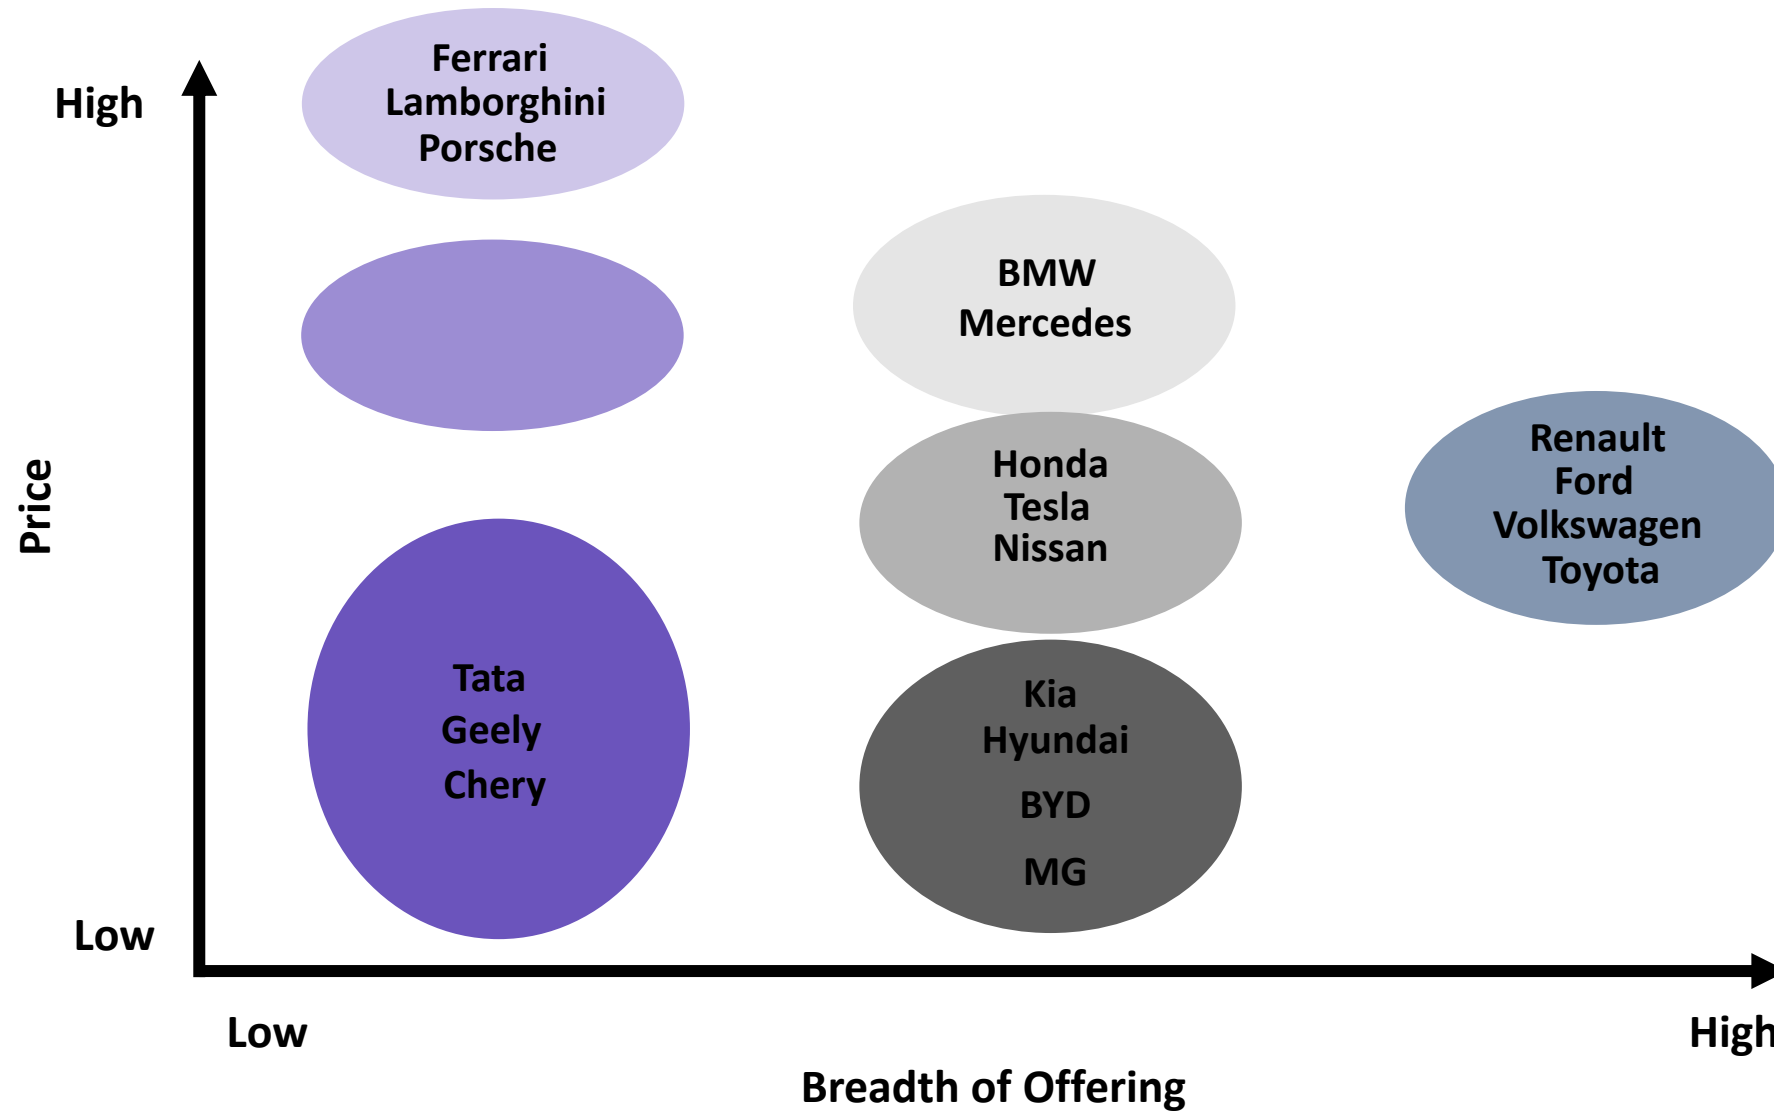

Takeaway

Leveraging the UNBX platform allows Tesla to reduce costs, localize production, and price competitively while maintaining its brand, software, and charging advantages in the subcompact EV market.

TESLA'S COMPETITIVE REPOSITIONING WITH UNBX PLATFORM

TESLA'S COMPETITIVE REPOSITIONING WITH UNBX PLATFORM

HOW WILL TESLA WIN?

\$59,990

\$79,990

\$79,990

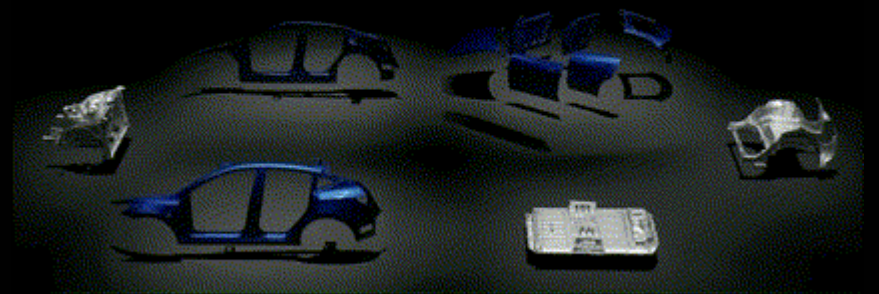

\$84,990

(Tesla, 2025)

INTRODUCING TESLA MODEL C & UNBX PLATFORM

- **Tesla Model C** → A new mass-market EV designed for affordability.
- Built using Tesla's **UNBX platform** → A next-gen manufacturing innovation.
- **UNBX** lowers production costs by over 50% while maintaining Tesla's brand & software advantages (Bloomberg, 2024).
- Designed to compete in a target price range of (~\$25K–\$38K) made possible by UNBX.
- A key step in Tesla's evolution toward a broader market.

UNBX Platform based on unboxed manufacturing process

Variants for Different Buyers

Front Wheel Drive \$25,000 – Long Range Front-Wheel Drive \$31,000 – Performance All-Wheel Drive \$38,000

Lower Production Costs with UNBX Platform

- **Gigacasting & Unboxed Manufacturing** Reduces production costs by up to **50%** (Bloomberg, 2024).
- **Enables Model C to be priced around \$25,000**, making it Tesla's most affordable EV.

WHO ARE MODEL C'S DIRECT COMPETITORS?

	Vehicle	Price (USD)	Horsepower	Range (Miles)	Battery Size (kWh)	0-60 mph (Sec)	Charging Speed	Software & OTA Updates
	Tesla Model C	~\$25,000	~200 hp (est.)	~250 (Est.)	~50 (Est.)	~5.0 (Est.)	~Up to 170kW DC Fast Charging (Est.)	Advanced OTA; Potential FSD Capability
	Volkswagen Golf	~\$35,000	110-150 hp	N/A	N/A	9.9	N/A	Limited
	BYD Dolphin	~\$33,000	94 hp	~211	44.9	12.3	Up to 60 kW DC Fast Charging	Basic OTA
	MG4 EV	~\$34,000	168 hp	~218	50.8	7.7	Up to 117 kW DC Fast Charging	Some OTA Updates
	Hyundai Inster	~\$29,000	97 hp	~203	42	11.7	Up to 120 kW DC Fast Charging	Basic OTA Updates
	Nissan Leaf	~\$36,000	147 hp	~149	40	7.4	Up to 50 kW DC Fast Charging	Limited OTA

(Zecar, 2025; What Car?, 2025; Carwow, 2025)

WHY TESLA WINS IN THIS SEGMENT

Cost Leadership

- UNBX platform enables \$25K pricing without losing margins.

Brand & Software Ecosystem

- Unlike VW & BYD, Tesla's OTA updates & FSD keep models up-to-date—offering long-term value.

Tesla's charging network

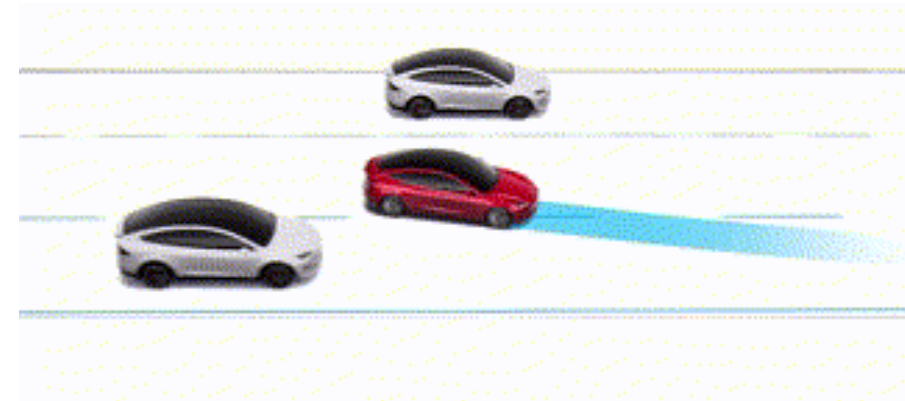

- A major advantage over budget EV competitors.

Superior brand loyalty & trust

- Tesla's reputation gives it an edge over newer brands like BYD, MG, and Geely.

Strategic Localized Production

- Gigafactories in China, Germany, and proposed Mexico facility allow cost-effective scaling (InsideEVs, 2023; Automotive Logistics, 2024).

Tesla's FSD in Action

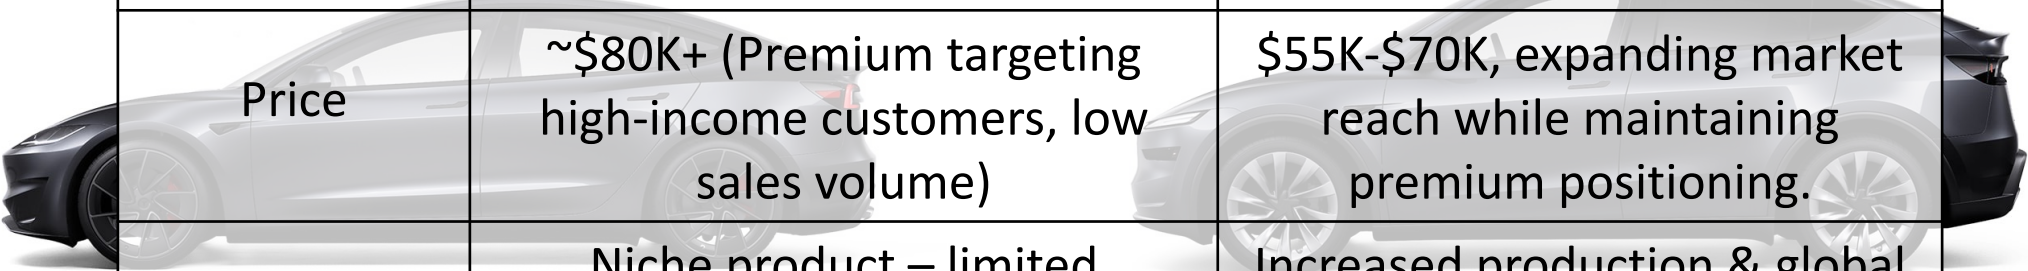

(Tesla, 2025)

HOW UNBX PLATFORM EXTENDS TO MODEL S/X

(Tesla, 2025)

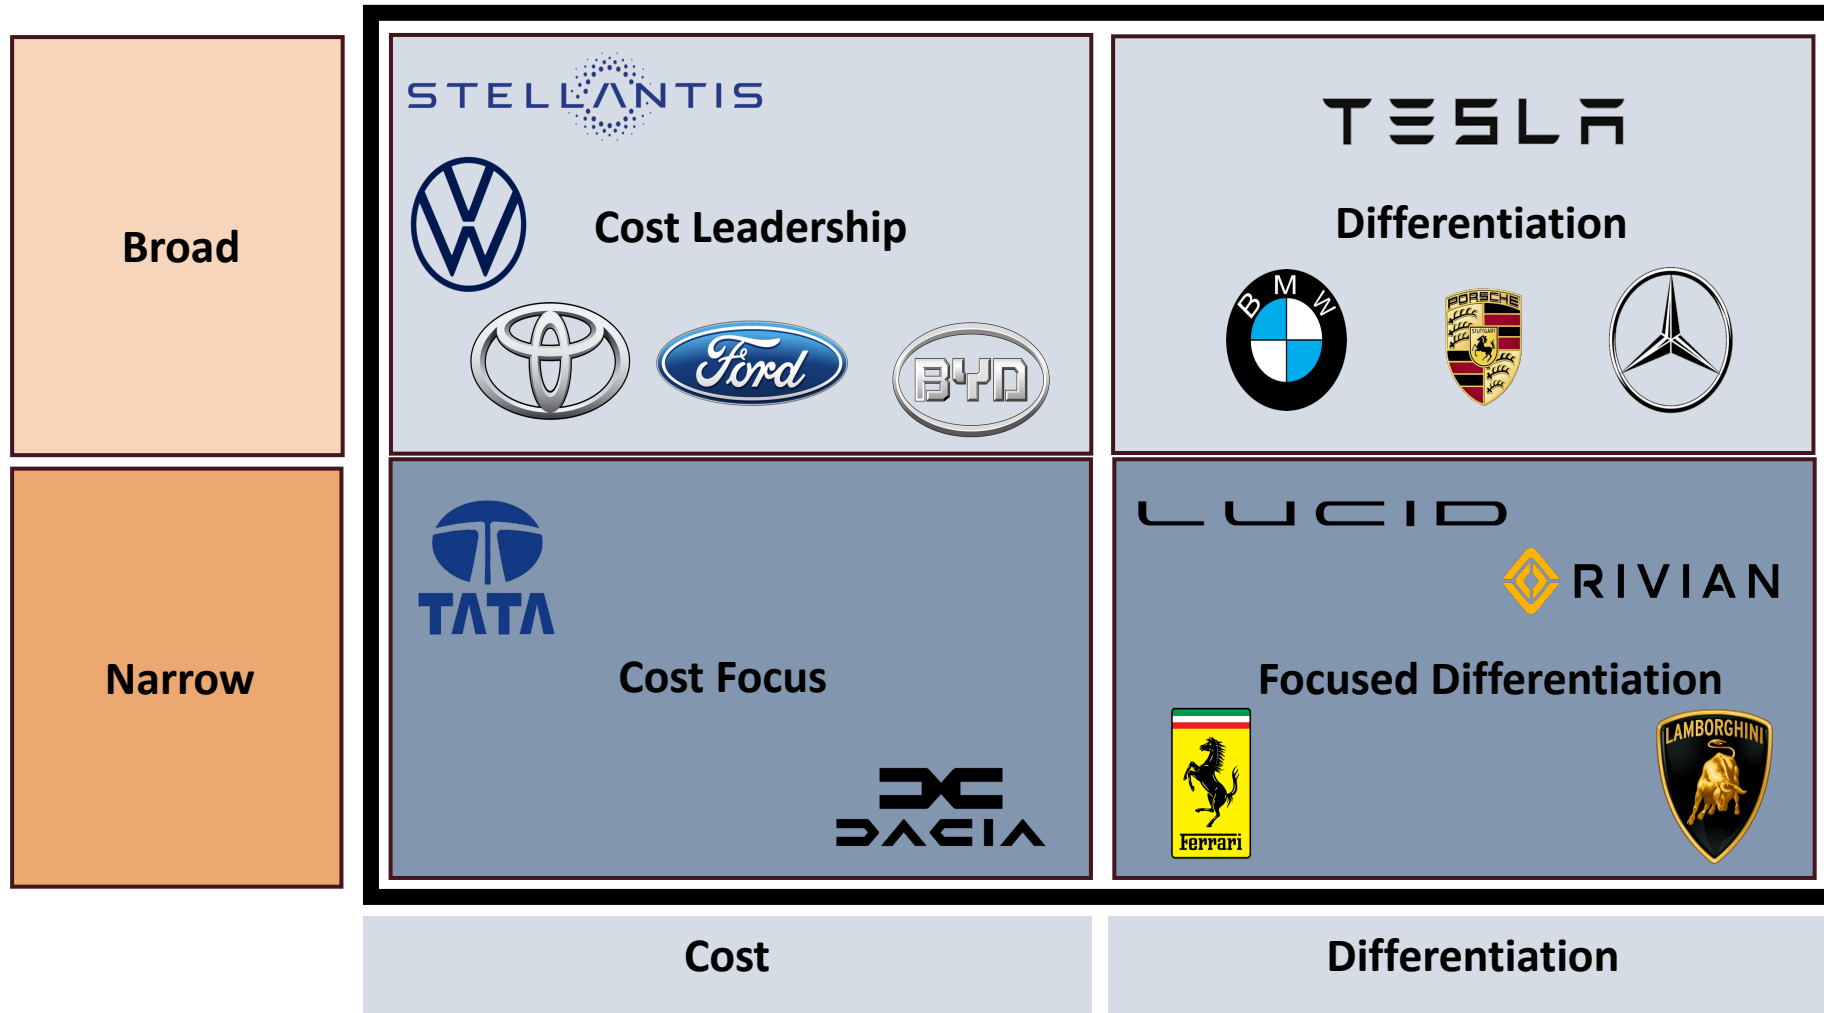

HOW UNBX PLATFORM EXTENDS TO MODEL S/X

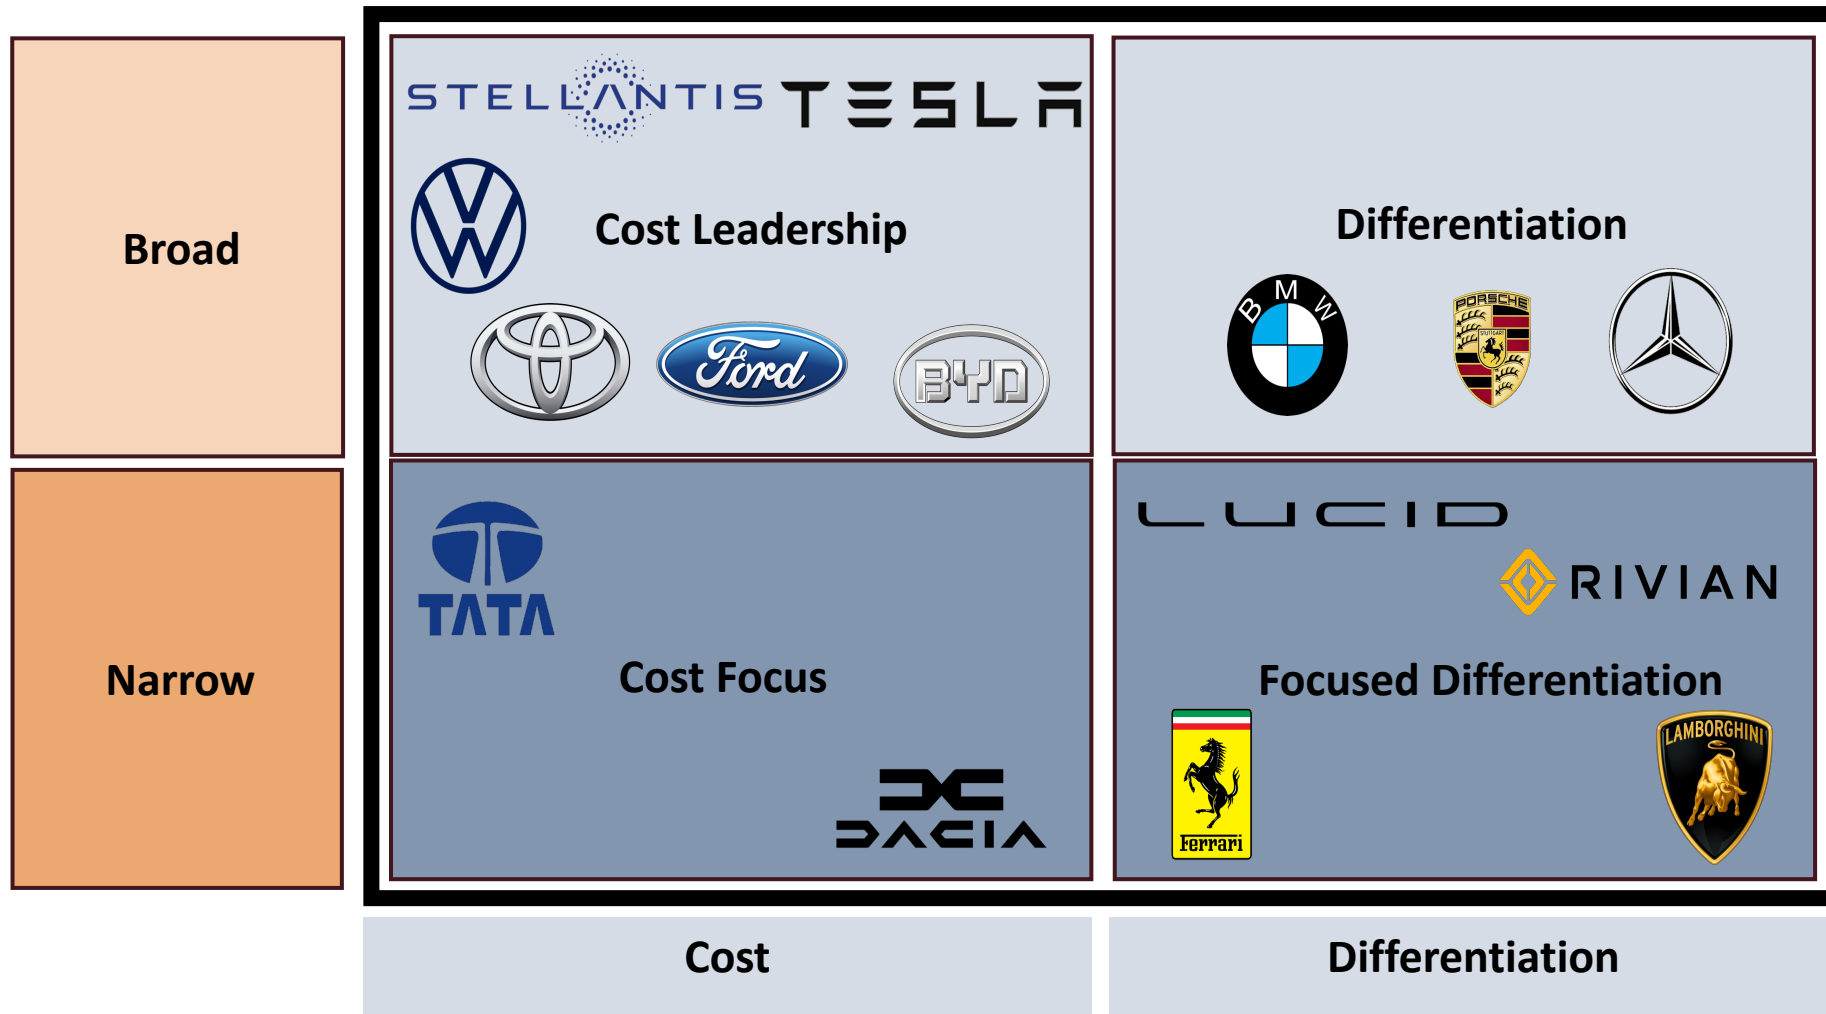

4 Ps	Current Model S & X	Future with UNBX
Product	Large, expensive luxury EVs	Redesigned using UNBX for modularity & efficiency
Price	~\$80K+ (Premium targeting high-income customers, low sales volume)	\$55K-\$70K, expanding market reach while maintaining premium positioning.
Place	Niche product – limited production RHD variants discontinued	Increased production & global market expansion making model S & X more competitive.
Promotion	Focused on exclusivity & performance	Repositioned as high-tech, ultra-efficient premium EVs

(Not a Tesla App, 2024; Business Insider, 2019; Electrek, 2023)

Shift in Tesla's Competitive Approach

Shift in Tesla's Competitive Approach

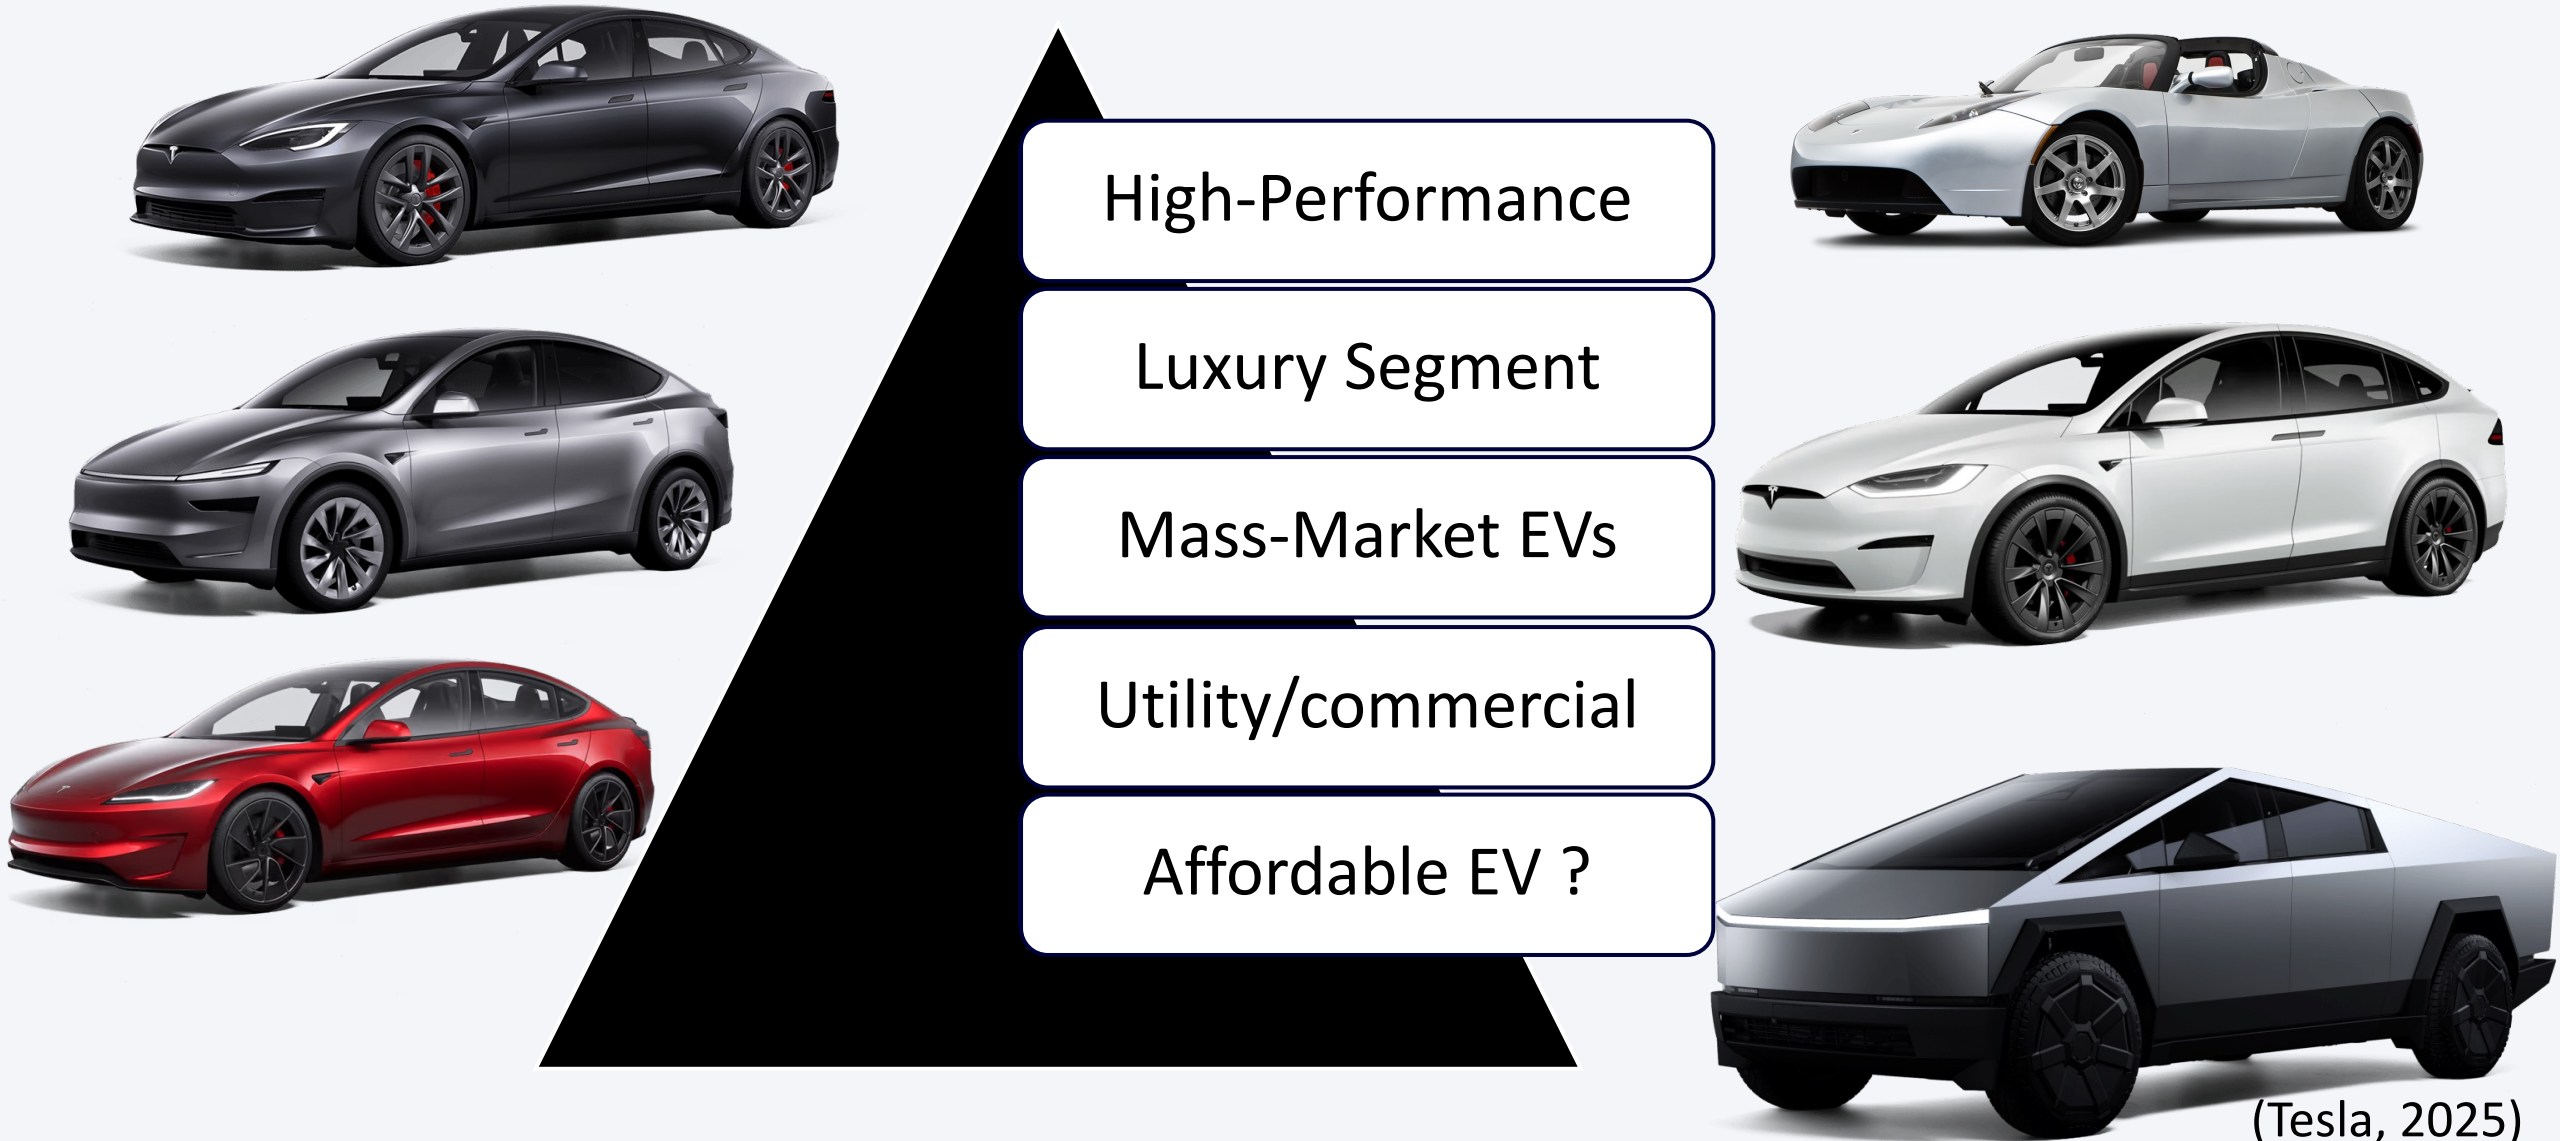

Tesla's adoption of the UNBX platform allows it to transition from a differentiation-focused automaker to a cost leader in the EV market, aligning it with mass-market players like VW, Ford, and BYD.

Affordable EVs

(Tesla, 2025)

HYBRID APPROACH

RECAP: A DUAL STRATEGY

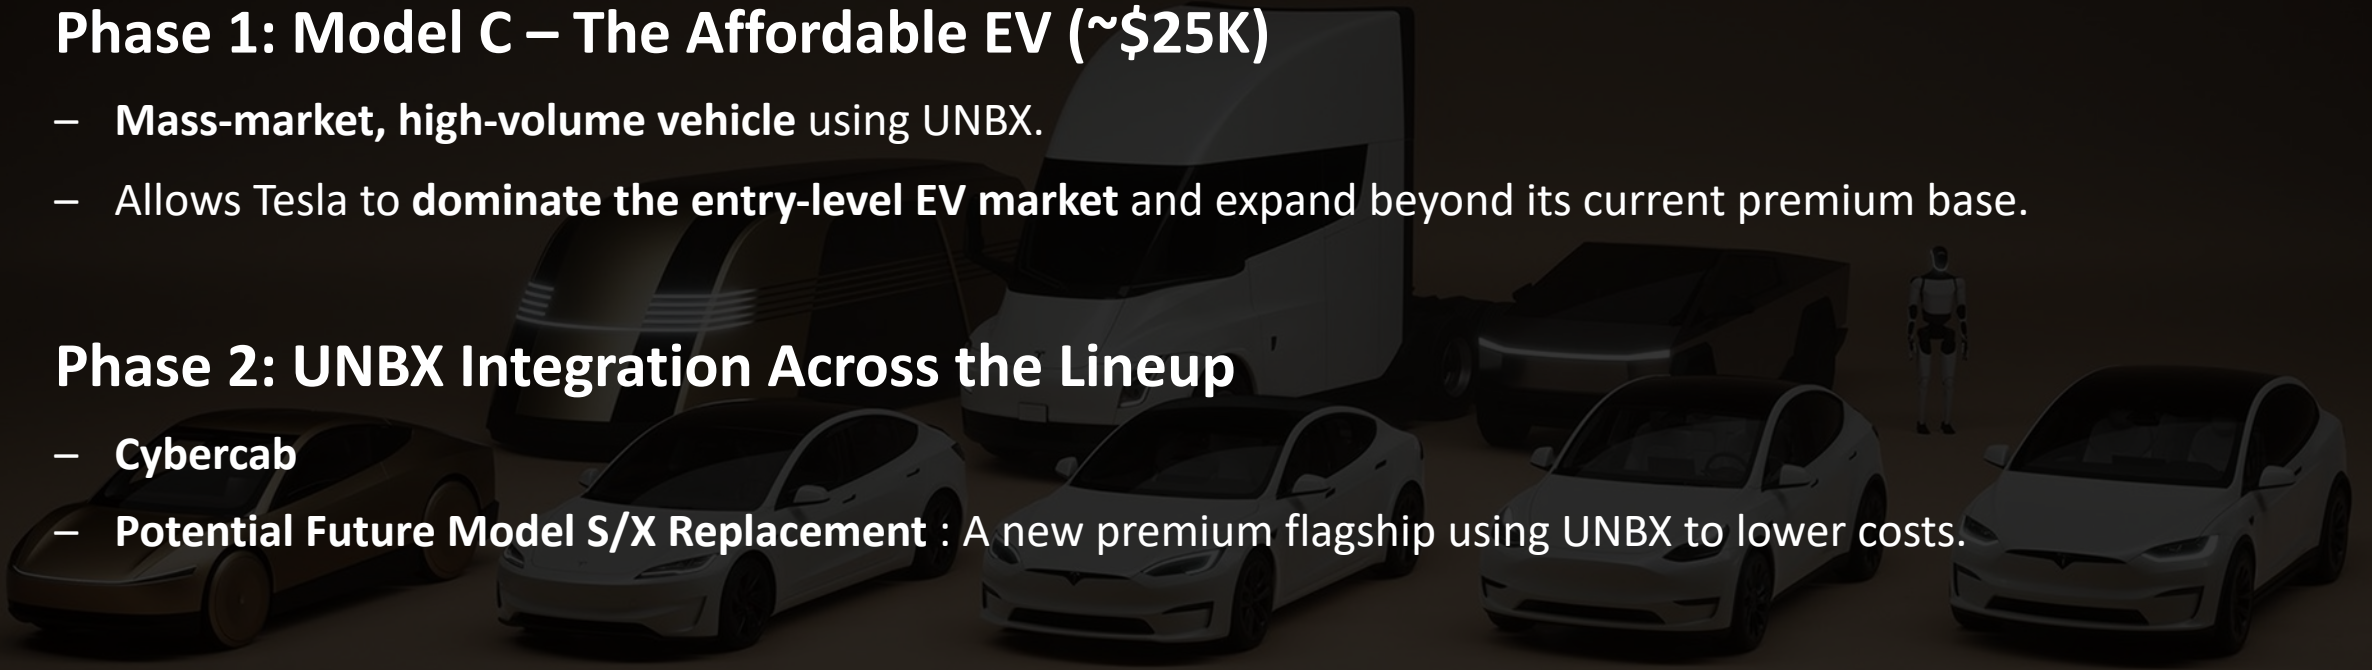

To maintain leadership, Tesla should leverage the UNBX platform while expanding into new market segments:

Phase 1: Model C – The Affordable EV (~\$25K)

- Mass-market, high-volume vehicle using UNBX.
- Allows Tesla to dominate the entry-level EV market and expand beyond its current premium base.

Phase 2: UNBX Integration Across the Lineup

- Cybercab
- Potential Future Model S/X Replacement : A new premium flagship using UNBX to lower costs.
